

Tranqui**Technology**

Search Engine Submission & Content Writing Overview

Version 1.2: 10/17/2009

About Tranquil Technology

Tranquil Technology was founded in 2007 as a web development consulting firm in the Atlanta area. We provide numerous internet-based services including: web design, blog design, web application development, search engine optimization, and content creation. We can help your company or organization with any project no matter the size. Being a smaller web firm, we are able to provide more affordable rates and in turn generate higher customer satisfaction.

When we first incorporated the business, we wanted a name that was unique and stood out from our competition as well as a name that made you feel secure and relaxed. With Tranquil meaning “free from commotion” and “peaceful”, we knew we had discovered the right word for our company.

Content Submission Pricing

The majority of your customers are going to be users surfing the internet looking for a qualified professional who can satisfy their business needs. In order for these customers to find your website, you need to be located in a search engine, a web directory, social site, or even having your blog submitted will bring traffic to your website.

Additionally, all of our submission services are manually formatted for submission. By manually submitting your information there is a greater chance of search engine acceptance and thereby an even greater chance of receiving traffic to your website.

Website Submission 100 Directories: \$39.99	Website Submission 200 Directories: \$54.99	Website Submission 500 Directories: \$97.99

Content Writing Pricing

One of the most important things that impact your customers directly upon reaching your website is your content. After all, some of the main reasons the customer could be visiting your site in the first place is for your content. It is important to have intelligent and though provoking articles, press releases and even blog posts that help to captivate your audience. In the 21st century, web 2.0 technology is becoming the standard, and because of it this small applications such as blogs and RSS feeds are becoming a popular method to reach more customers. A blog is a web application used to communicate short bits of information on a daily or weekly basis.

Article Writing

By having a professional written article on your website you are establishing credibility and trust with your visitors. These two small qualities are ultimately the driving factors that differentiate you between your competitors.

400-500 word articles delivered within 3 business days for \$59.99

Blog Writing

Having a blog in the 21st century is essential to bring in new forms of traffic to your website on a daily basis. By adding more web 2.0 technology to your website you can guarantee yourself a broader audience as well as giving your site a higher page ranking. The higher page ranking can be contributed to the fact that search engines scan your blog on a daily basis looking for fresh content to update their system.

250-300 word blog posts delivered within 3 business days for \$34.99

News Article Writing

The majority of news written on the internet comes from part time journalists and freelancers who are captivated by something and want to share what they see with the world. Writing a captivating news article can bring a large amount of traffic to your website or blog.

450 -500 word news article delivered within 2 business days for \$64.99

Press Release Writing

Are you ready to go live with a new website, product or service? We will offer you exposure to local and national media as well as help increase the growth of your company by accurately promoting new products and services to your customers.

500-600 word press release writing delivered within 2 business days for \$79.99

Web Page Content Pricing

There are two types of web page content services that help define your information to your customers. The first is called “copywriting” which is the process to write the content for your website. While the second is called “copyediting”, this is the process to edit the content of your website. It is important to remember that web page content and overall site content are two different things. Copywriting and Copyediting take place with the actual per page content, while article, blog, news and press release writing deal with specialty areas of your website or adjacent web 2.0 applications.

Copywriting

\$99 per page (minimum of 5 pages at 500 words per page and 10 keywords)

5 Pages = \$495 / 10 Pages = \$990

Copyediting

\$59 per page (minimum of 5 pages at 500 words per page and 10 keywords)

5 Pages = \$295 / 10 Pages = \$590

Social Bookmarking & Identity Pricing

With the web evolving into a better means of communication between people it has become apparent that email and instant messaging can longer be the absolute method for chatting. Instead massive social communities and web 2.0 groups have sprung up all over the internet. These websites are a means to provide direct site visitors, brand exposure and an alternative to your current website. Through the use of our social bookmarking and identity content packages we can help your site capitalize on the growing needs of social websites such as: Facebook, Twitter, Digg, and more.

Social Bookmarking Identity Starter

Creation of 75 social media identities from a personalized email account for \$129

In your final report we will list all of the username and passwords for your social media websites, as well as your email account. Turnaround time for 75 sites is 5 business days.

Social Bookmarking Identity Premium
